

AVANISH KASAR

Computer Science Engineer | GDG Organizer | Google Student Ambassador | AI/ML Builder

India | +91 9326466780 | avanishkasar57@gmail.com | linkedin.com/in/avanishkasar | github.com/avanishkasar | avanish.tech

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, TypeScript, SQL, HTML5/CSS3
- **Core CS:** Data Structures & Algorithms, System Design, Complexity Analysis, REST APIs, Database Design
- **Backend & Frameworks:** Node.js, Express.js, FastAPI, Firebase, SQLite, Git/GitHub, CI/CD
- **AI/ML:** LLMs, RAG, NLP, Machine Learning (Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch), Prompt Engineering, Vector Databases (FAISS, Chroma)
- **Cloud & Tools:** GCP, AWS Fundamentals, Vertex AI, Streamlit, Postman, Linux, Microsoft 365

EDUCATION

B.E. Computer Science & Engineering | A. P. Shah Institute of Technology (APSIT), University of Mumbai
In Progress (Semester IV – 8.20 GPA, 2024–Present)

EXPERIENCE

Google Developer Groups Organizer (Lead) | Google Developer Groups India | Sept 2025 – Aug 2026

- Collaborated with industry experts, Developer Advocates, and startup professionals to organize knowledge sharing sessions bridging academia and real-world tech
- Organized technical workshops, hackathons, and speaker events; engaged 3000+ students per event on emerging tech (AI, Cloud, Web Development)
- Mentored 50+ peers on Git/GitHub workflows, project structuring, open source contributions, and technical presentation skills

Google Student Ambassador 2026 (Gemini) | Google India | 2026–Present

- Driving Gemini AI awareness across district; organized 3+ product activations and demos reaching 800+ students

Business Development Intern | Metvy EdTech, Mumbai | May 2025–Jun 2025

- Supported lead generation and sales pipeline operations across 30+ prospect accounts; improved follow-up efficiency through data-driven tracking and reporting

PROJECTS & TECHNICAL WORK

ML Research & Demand Forecasting System | Python, ARIMA, XGBoost, RAG, Gemini API

- Built RAG pipeline for structured retrieval and LLM grounding; evaluated quality across 5+ prompting strategies
- Developed e-commerce demand forecasting combining historical data with Google Trends; engineered features (price lags, rolling averages); evaluated RMSE/MAPE
- Formalizing research into applied ML publication with experiment rigor and reproducibility

Playlistify AI - Music Recommendation Engine | Node.js, TypeScript, Gemini API, Spotify API, SQLite

- Engineered NLP pipeline: parses natural language intent, extracts mood, maps to Spotify playlists via LLM function calling
- Designed agent-based memory system with structured JSON output; implemented guardrails for safe LLM usage

ARchitect - AI + AR Interior Design Platform | HTML/CSS/JavaScript, Firebase, AR Tools

- Built web-based AR platform for furniture visualization, 3D room planning, and budgeting workflows with AI recommendations
- Built background services for real-time processing and Firebase for data synchronization

AWARDS & RECOGNITIONS

- Build and Grow AI Hackathon 2.0 - Top 15 Finalist (1,766+ teams); Grand Finale at Jio Institute (2025)
- Hack This Fall 2025 - Top 10 Pan India; Apify Track Reward Winner; invited to Hacker House at Zoho

CERTIFICATIONS

- Google Cloud Professional Machine Learning Engineer (2026)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Nvidia Building LLM Applications Certification
- Google Cloud Arcade Challenge - Cloud Fundamentals & Networking | Postman API Fundamentals
